DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claim 5, it is ambiguous and indefinite whether applicant is claiming an erroneous insertion preventing recess portion on the adapter device, the electronic equipment, or both. The limitation is given little weight. Regarding claim 6, the claim is incomprehensible and given little weight.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klatt et al. ("Klatt") in view of Kurz et al. ("Kurz") and Stahl. Regarding claims 1, 5, and 6, Klatt discloses an IC card adapter 1 including a loading portion (4) "adapted to load the host electronic equipment" as claimed, a terminal portion as claimed, an opening 10 including cut portions where the opposing cut portions are different from each other. Klatt does not show insertion orientation indicators. Stahl and Kurz disclose insertion orientation indicators (see figure 1 of Kurz and label 21 of Stahl). At the time of the

invention, it would have been obvious to include various instructions or orientation indicators on the Klatt device (on both surfaces or as desired) as taught in Stahl and Kurz. The suggestion or motivation for doing so would have been to assist a user in orienting the device, such motivation being well known in the art. Regarding where the indicators (such as tags or labels or imprints) would be located, whether on two or one side, or whether in the front or back of the device, the choice of location and content of various orientation indicators would have been a matter of engineering design choice without patentable significance.

Per claim 2, the cut portions are symmetrical.

Per claim 3, the bottom face is greater than the top face.

Per claim 4, the terminal and connecting portion are connected by a board.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Application/Control Number: 10/510,724 Page 4

Art Unit: 2833

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ross Gushi whose telephone number is (571) 272-2005. If attempts to reach the examiner by phone are unsuccessful, the examiner's supervisor, Paula A. Bradley, can be reached at 571-272-2800 extension 33. The phone number for the Group's facsimile is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
